**Apple Media Services:
Apple Books Collection Information**

May 2019

File name Apple Books Collection Information.json

File description The file contains information about the user's Apple Books collections.

Why Apple keeps this information Apple retains this information in order to show user-created collections, reading progress, and other aspects of the user interface consistently across the user's devices.

Field Name	Details
Title	The title of the collection
LastModification	The date and time on which the collection last was modified
deleted	Whether or not this collection has been deleted (held for the lifetime of the user's Apple account, since the system where this is stored does not know what devices the user owns)
Contents - id	The content identifier of a book in the collection, when obtained from the Apple Books Store
Contents - description	The content's title, if known
